Status of the Claims

1. Claims 1-17 are pending in this application.

Drawings

2. This application has been filed with 24 sheets of drawings, which currently are acceptable for examining purposes.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8 are drawn to a method for creating/editing usage conditions (US classification 705/52).
 - II. Claim 17 is drawn to a computer including a processing device to make a copy of encrypted content (US classification 705/57).
 - III. Claims 9-16 are drawn to a computer-readable medium (e.g., a storage device that contains instructions), US classification D14/348.
4. The above inventions are distinct, each from the other because inventions I, II, III contain different inventions as indicated by different US classifications (inventions are also different because they have differences in operations, in different functions/structures, or different effects).

Because these inventions are distinct and have acquired a separate status in the art because of their recognized divergent subject matter, (e.g., the search required for Group III may not required for Groups I, II), restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
